CORSO BREVE PER DOTTORANDI

Eddie BROMHEAD

Former Professor of Geotechnical Engineering
at Kingston University, UK

LANDSLIDE ANALYSIS AND REMEDIAL MEASURES

02, 03, 04, 05 Dicembre 2013

ore 14:00 – 16.00

Aula B - Dipartimento di Scienze della Terra

Via G. La Pira, 4 - FIRENZE

per informazioni:
www.geo.unifi.it

PROGRAMMA

Lunedì 02.12.2013 (ore 14.00 – 16.00)

Developing geotechnical software for yourself and others:
practical advice

Martedì 03.12.2013 (ore 14.00 – 16.00)

Using geotechnical software of the limit equilibrium type
to analyse slopes and slope failures and remedial works

Mercoledì 04.12.2013 (ore 14.00 – 16.00)

Selecting the right type of remedial measures for failed
slopes, and analysing their effectiveness, robustness and
economy. What to do if it all goes wrong, and you suffer a
failure on site.

Giovedì 05.12.2013 (ore 14.00 – 16.00)

Some thoughts about the Vajont landslide: why it went
wrong, and how difficult it is to prevent a slope failure from
turning into a disaster.

Aula B

**Dipartimento di Scienze della Terra
Via G. La Pira, 4 – FIRENZE**
